

MERCURY

BY
ROSS LOVEGROVE

ROSS LOVEGROVE

Born in Wales in 1958, Ross Lovegrove is a visionary industrial designer for whom the inherent logic and beauty of nature are paramount to any man-made object. Having designed everything from modes of transportation to furniture to human-scale electronic devices, minimal organic beauty underlies every concept.

Widely published and award-winning, Lovegrove creates beauty through the marriage of biology and object. His TED talks on the topic of "Fat-Free" organic design have been viewed over 4 million times.

REFLECTIVE

The light projected by two of Mercury's floating pebbles bounces off their biomorphic surfaces, reflecting the dynamics of natural light and movement amongst the sculptural fixture's surrounding environment.

INGENUITY

"A ceiling fixture that places a floating assembly of large pebbles below a simple modern aluminum disc. These in turn reflect each other, bouncing light between their taught biomorphic surfaces and reflecting the environment around them. During the day, the piece acts as a sculptural object reflecting the dynamics of natural light and movement of people around them."

- Ross Lovegrove

FLUIDITY

Considering Mercury is the only liquid metallic element that exists, the light fixture defies its solid metal appearance, having its elements flow lightly.

HARMONY

Part of the Hydro series, Mercury's design embodies the motion of water. The pebbles move in unison, bringing a modern sense of harmony and togetherness to any interior.

CUSTOM APPLICATIONS

A wide range of customized configurations can be dreamed of using the mercury lighting and non-lighting pebbles as the basis element of a cluster. For more information regarding custom applications, please contact your Artemide Sales Representative.
