

MESMERI

BY
ERIC SOLÈ

Artemide®

ERIC SOLÈ

With a desire for overall simplicity, French designer Eric Solè created functional, futuristic works of art with soft curves which look as good in the dark as when illuminated.

ELEGANCE

The gently curved aluminum structure of Mesmeri exudes effortless elegance. Its supple lines encase and mask the internal light source emitting upwards.

REIMAGINED

Mesmeri's dimmable 300 watt halogen light has been reimagined with LED, to adapt to today's standards of intelligent, eco-friendly, and energy efficient lighting.

ACCENT

Mesmeri is an elegant wall lamp that will compliment and animate any interior space with character, whether residential or commercial. Its attractiveness lies in its curve-shaped diffuser, round wall support bracket in die-cast aluminum, and specular aluminum reflector.
