

Meteorite

Pio & Tito Toso

Pio & Tito Toso

Italian brothers born in 1973 and 1971 respectively, Pio & Tito Toso love working with light and its endless variations. Their interest in combining both ancient and contemporary techniques of making and finishing glass, combined with cutting-edge energy-performance pushes the boundaries of what can be achieved in fixture design.

Savoir-Faire

Meteorite's stunning aesthetic is handcrafted of Venetian glass. The handblown double layer artistic glass pattern is inspired by nature's organic textures, and is obtained by a succession of glass molding, frosting, sandblasting, and acid etching techniques.

Distinct

Each fixture is handmade and the subtle nuances succeed in making every light fixture distinct. In the evolution of lighting, Meteorite resides ahead of time in light dispersion and aesthetics.

Duality

An evolution in lighting fixtures, Meteorite's intricate glass pattern serves as a stellar design piece, even when turned off.
