CARLOTTA DE BEVILACQUA

CARLOTTA DE BEVILACQUA

Architect, designer and above all humanist, Carlotta de Bevilacqua has been a force in contemporary lighting since the 1980's. A pioneer in LED research and implementation, she created the concept "The Human Light" in which lighting encourages not only the well-being of those who live, work and interact with it, but also the planet.

As interested in science of light as the sensory experience, de Bevilacqua seeks to create synergy between products and users through accessible, experimental design. A life-force at Artemide for nearly 4 decades, in addition to her own studio she oversees Danese Milano creating minimal, yet elegant, products which further complement the built environment.

In addition to widespread recognition for her work, in 2011, she received a Red Dot Design Award for the Algoritmo and Copernico.

MODULAR

Combined in creative configurations, Altrove embraces a solid geometric shape and can be tiled in various numbers to create a desired modern lighting solution for either residential or commercial environments.

AMBIANCE

Two openings along the two opposing sides of the perimeter structure enable a wall washer emission. The intensity of light can be controlled to fulfill a warm ambiance.

MODERN

Altrove's modern design and sleek shape are composed of a mirrored stainless steel perimeter and a matte finish prismoptic lateral diffuser. It features mirrored polished aluminum reflectors and an engraved transparent methacrylate front diffuser.
