Foster + Partners Design

FOSTER + PARTNERS

Foster + Partners Design

Foster + Partners is one of the most innovative architecture and integrated design practices in the world. Over the past four decades, the practice has pioneered a sustainable approach to architecture through a strikingly wide range of work, from urban masterplans, public infrastructure, airports, civic and cultural buildings, offices and workplaces to private houses and product design. Based in London, with offices worldwide, the practice has an international reputation, with buildings in six continents.

Precision

Orsa is an elegant pendant light, pared down to its essential elements. The glass cover is designed so that the light source remains invisible, giving the appearance of a floating disk of light.

LIGHT + BUILDING, FRANKFURT, GERMANY
Premiere showcase, industry meeting place
and business forum

Focus

The diffuser takes its shape from the focused output of the LED. LED light is diffused through a specially engineered etched lens that allows the light to focus over a wider area.

Composition

Orsa is designed for use as a single unit or as an element of a composition to form the Orsa Chandelier.
