Frameless collection

by **SANJA KNEZOVIĆ**

The **Frameless** is a member of the Frame family of low tables. The only difference between them is in the thickness of their metal construction. As the name suggests, Frameless appears as the ultimate light object thanks to its gracile slim metal construction. The table can be used to stand alone or arranged in a series in the given framework. The selected height is determined by its position as the main or side table. The frame is made of metal profile with glass or compact panel placed onto it.
